Water Group Job 3008: Water Service Break Notification

Special Advisory: June 9, 2009

As noted in the previous newsletter, the water main replacement work is currently in progress in the North Harbor Drive area. During construction on June 9th, a 2" water service line was accidentally hit while digging was in progress in the northbound lane of Pacific Highway at its intersection of North Harbor Drive. Due to this construction incident, the project has been delayed while construction crews aggressively work to repair the water leak. If a water shut-off is necessary for this repair, the City of San Diego Public Utilities Department will notify businesses and residents. The anticipated completion for this repair will be this evening at midnight.

There is a temporary road closure on Pacific Highway between North Harbor Drive and G Street. Please adhere to temporary detours and traffic signs. Business and pedestrian access will be maintained. Please drive slowly and use caution when you are traveling in the project area. Please keep in mind that construction is still in progress.

We thank you in advance for your continued patience and support while repairs are being completed. For more information, please visit our website or call us directly on the Group Job Public Information Line provided below.
